## Remote working with Microsoft 365

Remote working is here to stay. After rapidly enabling employees to work from home, many businesses are now taking time to assess the security of their remote work environments. A common question that comes up in these evaluations include: How can we help employees secure when working remotely? Microsoft 365 addresses this with:

### Collaboration in real time:

Achieve real-time teamwork with colleagues and partners with Microsoft Teams. Your organisation can easily access files, chats and apps in one workspace – across desktop, web and mobile.

### Online meetings from anywhere:

Host audio, video and web meetings with anyone within or outside your organisation. Make meetings easier with high-quality audio and video based by enterprise-grade security and compliance.

### Protect against lost or stolen passwords with MFA:

Multi-Factor Authentication (MFA) protects your team against lost and stolen passwords by verifying user identities. MFA prevents 99.9% of identity attacks.

### Secure and manage devices that access data:

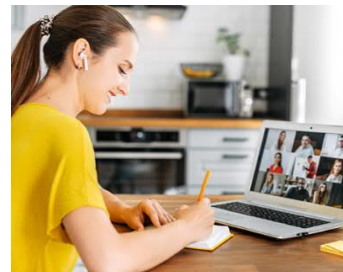

Manage work data on mobile devices with Intune. Rest easier knowing corporate data is protected by mobile device and application management (MDM and MAM) on personal devices.

### Managing Productivity & Risk

Microsoft 365 is a complete, intelligent solution that combines Office 365, Windows 10 and Enterprise Mobility + Security to empower employees to be creative and work together, securely. It integrates Microsoft's best-in-class productivity tools with advanced security and device management capabilities to help safeguard your business.

### Work better together & get achieve more

Collaborate, share and communicate with flexible tools that go where your team goes. Connect better with customers and colleagues with a range of communication tools, from email and instant messaging, to social networking and video conferencing. With multi-party HD video, content sharing, shared calendars, and team chat, you'll always be in sync with your team. Further increase productivity with Office apps enhanced with the latest AI tools.

### Protect your devices, data & people

Know that lost or stolen devices are protected with Windows 10 built-in encryption capabilities like BitLocker and BitLocker to Go. Help prevent accidental data leaks by securely separating business information from personal information with Windows Information Protection and perform a remote Selective Wipe of business data on demand while leaving personal data untouched. Make sure employees always have access to files while confining company information to Office apps, using App protection.

### Make better decisions with intelligence

With various analytics and intelligence capabilities, Microsoft 365 gives you the insights and assistance you need to do your best work every day.

## Scalability

With Microsoft 365, you pay for what you use. As your organisation grows, you simply pay for the additional services and storage needed.

### Start your remote working transformation

You can enjoy a stress-free migration to Microsoft 365 remote working with OmniLedger’s strategic assessment and Managed IT services. Our team of specialists will ensure that your organisations unique requirements and strategic goals are achieved, with minimum disruption to your day-to-day operations.

## 01

### Book your free consultation

Contact us by phone or email, for a free consultation about your requirements.

## 02

### IT Audit/Assessment

OmniLedger’s engineer will assess your IT and report back on their findings.

## 03

### Project Initiation

Your dedicated project manager will establish success criteria and develop a plan that fits your needs.

## 04

### Implementation

Continue with your day-to-day operations while our team gets you set-up in the background.

## 05

### Go Live

On an agreed date, all your critical operation data will be transferred to your new solution, with user’s enrolled and trained.

## 06

### Support

Benefit from OmniLedger’s day-to-day managed support services for all things related to IT.

*“I just want to cap the week off by saying thank you to you and the team. We appreciate the planning and coordination that went into the migration and from our perspective we are very happy with the outcome so far. We wish we upgraded sooner! And it goes without saying that we are very thankful for Sam’s on-going support for our IT needs.”*

**Faisal Hussain** Chief Operating Officer at Spitalfields H.A.
